

Stray Kids Site - Initial Build Discussion Notes

Creative Director: Hannah Peaslee

Designer: Max Francisco

Design Suggestions

- Main/home page
 - Have the landing screen be the big Stray Kids logo with the pink theme (like this one - <https://ih1.redbubble.net/image.4227762493.8718/flat.750x.075,f-pad.750x1000,f8f8f8.jpg> - if this doesn't work then just the regular white one is fine), just like how the Rock-Star logo was implemented in the original mockup, where that's the only thing you can see and you have to scroll down to get to the intro text
 - Move the Rock-Star stuff (the big logo and the info about it being the 13th ep out now etc etc) to the bottom of the page below the intro text, so it kind of finishes off or closes out the page

Concerns

- Struggling a bit with aligning the vertical text on the pages correctly
- No big concerns with responsiveness - just need to implement it
- No other concerns, just need to continue to flesh out the design and add all the missing elements
